

Order Form:
Timber Design Guide

WCTE Special Price
NZ \$122 delivered

The third edition of the Timber Design Guide is essential reading for all architects and engineers designing government buildings, because of the recent announcement that all new government buildings up to four storeys must have a timber option concept designed and priced.

Architects will find many chapters of interest including durability and treatment, moisture effects, timber finishes, fire resistance and acoustic behaviour.

Timber merchants and sawmillers will be interested in chapters on wood and wood properties, also manufacture and use of sawn timber, glulam, LVL, roundwood and panel products. Structural engineers will find essential design aids and worked examples on design of beams, columns, trusses, arches, pole structures and portal frames.

Price per copy: NZ\$122.00 each includes postage & handling anywhere in the world

ORDER DETAILS:

Order Quantity: Please send me _____ copies of "Timber Design Guide"

Name: _____ Company: _____

Mailing address: _____
