Developments in Timber-Glass Hybrid Load Bearing Elements in Europe

Tuesday, 10th October, 18.00 – 18.45

Light refreshments will be served prior to the presentation from 17:30

Speaker Biography: Dipl.-Ing. Dr. Matthias Rinrhofer's doctoral research in Structural Design and Timber Engineering at TU Vienna (Vienna University of Technology), Austria, while working with Prof. Wolfgang Winter, focused on the development of Timber Glass Hybrid Elements for large scale load bearing applications. The research topic has been the basis of an international collaboration in Europe involving several high profile research institutes and industry. This presentation will summarise some of the key developments from research conducted in Vienna.

Venue location:

Room 1.401, Faculty of Engineering
20 Symonds Street,
The University of Auckland

Enquiries:

Dr. Gary Raftery: g.raftery@auckland.ac.nz
Prof. Pierre Quenneville: p.quenneville@auckland.ac.nz
